JOURNAL OF APPLIED ELECTROCHEMISTRY 19 (1989) 955–959

Indexes to Volume 19 (1989)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion

Active-passive behaviour and stress corrosion cracking of A516 steel in Baver solution, 368
Characterization of aluminium alloys in tetrahydrofuran media, 203
Chemical and electrochemical inhibition studies of corrosion and hydrogen surface embrittlement. I. $Fe_{0.78}B_{0.13}Si_{0.09}$ amorphous alloy in molar HCl, 83
Chemical and electrochemical inhibition studies of corrosion and hydrogen surface embrittlement. II. $Fe_{0.81}B_{0.13}Si_{0.04}C_{0.02}$ amorphous alloy in molar HCl, 512
Dissolution of tin in the presence of Cl^- ions at pH 4, 231
Electrochemical behaviour of AISI 321 stainless steel in methanol-H_2SO_4 mixtures, 317
Inhibition of corrosion of α-brass (Cu–Zn, 67/33) in acid chloride solutions by some amino pyrazole derivatives, 928
Organic electrolytes for corrosion testing of aluminium and Al–Li binary alloys, 157
Some electrochemical features of the *in vivo* corrosion of dental amalgams, 301

Technical note
A filter-press electrolytic cell with semi-continuous renewal of sacrificial electrodes, 946
A model for bipolar current leakage in cell stacks with separate electrolyte loops, 247
A numerical method of calculating secondary current distributions in electrochemical cells, 281
A rapid test to determine the state of an electrochemical process, 443
Approximate analytical design procedures for plug flow electrochemical reactors, 531
Axial dispersion in electrolyte flow through anisotropic packed beds, 263
Computation of primary current distribution and cell resistance at model electrodes with circular perforations, 183
Electrode current distribution in a hypochlorite cell, 630
Flow-through and flow-by porous electrodes of nickel foam. I. Material characterization, 43
Flow-through and flow-by porous electrodes of nickel foam. II. Diffusion-convective mass transfer between the electrolyte and the foam, 51
Removal of chromium from aqueous solutions by treatment with porous carbon electrodes: electrochemical principles, 311
Studies of bipolarity in fluidized bed electrodes, 877
The effect of metal and solution phase resistances on the current distribution in cylindrical electrochemical reactors, 500
The influence of mass transport on the deposit morphology and the current efficiency in pulse plating of copper, 188
The vertical distribution of current in a gas-evolving membrane cell, 657

Electrochemical mass transfer

An experimental study of anodic dissolution of copper in aqueous sodium chloride via laser-induced image processing, 354
An investigation of a potential step at a channel electrode, 889
Distribution of mass transfer over a 0.5-m-tall hydrogen-evolving electrode, 637

Short Communications
Electrochemical measurements of mass transfer coefficients in a cell simulating tooth canals, 108
Estimation of optimum anode geometry in chlor-alkali membrane cells, 90
Evaluation of mass transport in copper and zinc electrodeposited using tracer methods, 174
Laminar radial flow electrochemical reactors. II. Convective diffusion of inert tracer, 845
Mass transfer to and copper deposition on a round bar in a new type of electrolytic cell: the helix cell, 823
Mass transfer to percolated porous materials in a small-scale cell operating by self-pumping, 736
Mass transfer to volumetric electrodes with two-phase flow, 100
Natural convection mass transfer at expanded metal electrodes of different structures, 940
Transient regime in a parallelepipedic cell induced by a current or a potential step, 195

Electrochemical properties

Ionic conductivity of perfluorinated ionomer solutions and gels, 167
Measurement of the diffusivity of maleic acid by the rotating disc electrode technique, 113
On the conductivity of phosphoric acid electrolyte, 95
Viscosity measurements of low temperature molten salts, 290

Technical Note
Voltammetric behaviour of iron in cement. I. Development of a standard procedure for measuring voltammograms, 868

Electrode kinetics, catalysis

A Nafion–bound platinized carbon electrode for oxygen reduction in solid polymer electrolyte cells, 383
Efficient oxygen reduction in alkaline solution with platinum phthalocyanine on porous carbon, 105
Electrocatalyse de la réduction de l'oxygène sur oxyde mixte: $Cu_{1+x}Mn_{2-x}O_4$ en milieu alcalin. Etude par électrode disque–anneau, 28
Formation and dissolution of anodic oxide films on zirconium in NaOH: kinetic studies, 213
Heat-treated polyacrylonitrile-based catalysts for oxygen electroreduction, 19
Hydrogen evolution on iridium oxide cathodes, 255
Influence of iron impurities on the time dependence of the hydrogen evolution reaction on platinum cathodes during electrolysis of 30 w/o KOH, 882
Ni and Mo coatings as hydrogen cathodes, 519
Nickel hydroxide film electroformation in alkaline chloride solutions, 429
On the electrochemically induced release of dioxygen friom cobalt(II) complexes, 456
Stability of anodic tantalum oxide films in NaOH solutions, 768
The importance of superficial (adatom) surface oxidation in the electrocatalytic behaviour of noble metals in aqueous media, 758

Electrosynthesis

Anodic oxidation of benzyl alcohol to benzaldehyde in the presence of both redox mediator and phase transfer catalyst, 922
Biomass electrochemistry: anodic oxidation of an organo-solv lignin in the presence of nitroaromatics, 535
Electrocatalytic oxidation of methanol on platinum dispersed in polyaniline conducting polymers, 462
Electrochemical investigation on prostaglandin $F_{2\alpha}$ derivatives. II. Cathodic reduction of the iodinated prostaglandin $F_{2\alpha}$ and its methyl ester, 207
Electrochemical reduction of 2,3′-dinitrobenzidine in buffered aqueous methanol, 897
Electrochemical synthesis of 3-amino-4-hydroxybenzoic acid in aqueous base, 349
Electrochemically initiated (co)polymerization of acrylamide and acrylonitrile on a steel cathode – electrochemical and impedance study, 434
Electroreduction of nitrobenzene to p-aminophenol at a TiO_2/Ti electrode, 465
Growth of electrodeposited γ-manganese dioxide from a suspension bath, 540
Laminar radial flow electrochemical reactors. III. Electroorganic synthesis, 856
Oxidation of phenol to benzoquinone in a CSTER with modulated alternating voltage, 459
Preparation of pyrazine 2,3-dicarboxylic acid from its potassium salt by electrodialysis, 293
Preparation of polycrystalline thin films of $CuInSe_2$ by electrodeposition, 361
Scale-up of electrocarboxylation reactions with a consumable anode, 345
The electrochemical regeneration of Fenton's reagent in the hydroxylation of aromatic substrates: batch and continuous processes, 911

Energy conversion, batteries

A high performance molten carbonate fuel cell cathode, 1
A.c. impedance of niobium triselenide cathode in secondary lithium cells, 813
Al/Cl_2 battery with slightly acidic NaCl electrolyte. I. Porous graphite chlorine cathodes, 65
Al/Cl_2 battery with slightly acidic NaCl electrolyte. II. Ti–Ti/Ru oxide chlorine cathodes, 147
Characterisation of different grades of commercially pure aluminium as prospective galvanic anodes in saline and alkaline battery electrolyte, 547
Cyclic chronopotentiometric studies of the LiAl anode in methyl acetate, 239
Cycling of electrodeposited beta lead dioxide, 142
Dual solution-type HCHO fuel cell systems using an anion exchange resin membrane with electroless-plated Cu or Pd anode, 336
Electrochemical studies of lithium-boron alloys in non-aqueous media – comparison with pure lithium, 421
Electrochemical studies on solid state cells with amorphous electrolyte and mol % $70\,AgI–20\,Ag_2O–10\,(0.8\,V_2O_5–0.2\,P_2O_5)$ organic cathodes, 807
High-temperature C_1-gas fuel cells using proton-conducting solid electrolytes, 448
Impedance analysis of the lithium discharge in Li–$SOCl_2$ cells: synergetic effect of SO_2 and $LiAl(SO_3Cl)_4$, 413
Improvement of the discharge capacity of the alkaline MnO_2–Zn cell by using graphite intercalation compounds with CrO_3, 287
Investigations of a large-capacity medium-power saline aluminium-air battery, 323
Separators for acidic and alkaline batteries, 553
Stability of zinc/bromine battery electrolytes, 943
Stibine and arsine generation from a lead–acid cell during charging modes under a utility load-levelling duty cycle, 10
The discharge behaviour of the porous lead electrode in the lead–acid battery. I. Experimental investigations, 127
The discharge behaviour of the porous lead electrode in the lead–acid battery. II. Mathematical model, 136
The distribution of voltage losses among components of a battery, 505
Voltage delay during constant-current or constant-resistance discharge of Mg-MnO_2 dry cells: a comparative study, 495

Gas evolution

A population balance approach to the study of bubble behaviour at gas-evolving electrodes, 116
Effect of surfactants on the rate of mass transfer at gas-evolving electrodes, 219
Electrolytic resistance at a hydrogen-evolving nickel wire electrode, 453
Gas induced bath circulation in aluminium reduction cells, 703
Investigation of water electrolysis by spectral analysis. I. Influence of current density, 683
Measurement of bubble nucleation rates by an acoustic method, 668

Mechanisms of mass transfer of dissolved gas from a gas-evolving electrode and their effect on mass transfer coefficient and concentration overpotential, 713
Modelling of gas-evolving electrolysis cells. II. Investigation of the flow field around gas-evolving electrodes, 677
Modelling of gas-evolving electrolysis cells. III. The *iR* drop at gas-evolving electrodes, 720
New electrodes for oxygen evolution in acidic solution, 697
Potential drops due to an attached bubble on a gas-evolving electrode, 617
Role of gas bubbles adsorbed on a carbon electrode: electroreduction of chlorine gas in fused salts, 649

Materials for electrochemistry

Ceramic diaphragms for advanced alkaline water electrolysis, 605
Chemical modification of carbon fibres by esterification – optimization of fibre pretreatment, 341
Evaluation of cathode material properties relevant to the life of Hall–Heroult cells, 580
Mass transfer and structure of asbestos and non-asbestos diaphragms for chlorine and caustic production, 571
Material problems encountered in anodic MnO_2 deposition, 559
Material problems in the three versions of chloralkali electrolysis, 589
Material problems in electrowinning of aluminium by the Hall–Heroult process, 596
Material properties of cation exchange membranes for chloralkali electrolysis, water electrolysis and fuel cells, 566
New solid polymer electrolyte composites for water electrolysis, 162
Organic/inorganic electrodes (ORINELs) with continuous phase components, 331

Metal deposition, finishing

A contribution to the understanding of a.c. anodizing of aluminium, 829
Decomposition of citrate in electroless CoP baths, 152
Diffusion and migration in the electropolishing and anodic dissolution of metals, 76
Effect of iron(III) and lead(II) on the quality of copper electrodeposited from a pyrophosphate bath, 37
Electrocoating of iron and other metals with polypyrrole, 401
Electrochemical nucleation of mercury on platinum in the presence of organic additives, 819
Electrodeposition of chromium from Cr(III) electrolytes in the presence of formic acid, 933
Factors influencing the preferential orientations in zinc coatings electrodeposited from chloride baths, 377
Length distribution of aluminium etch tunnels, 69
Mechanism of nickel–molybdenum alloy electrodeposition in citrate electrolytes, 839
Orientation distributions by recovery behaviour in electrodeposited copper layers at room temperature, 752
Synergistic effects of adsorbed species on the surface morphology and crystal orientation of electrodeposited tin, 387

Papers

The effect of a.c. superimposed on d.c. and pulsating potential on the coercivity of electrodeposited Ni–Fe alloy thin films, 802

Mineral/metallurgical electrochemistry

Anodic behaviour of copper electrodes containing arsenic or antimony as impurities, 777
Effect of impurities on gallate reduction in alkaline solution – a linear stripping voltammetry study, 61
The interaction of pyrite with solutions containing silver ions, 744

Molten salt systems

Aluminium dissolution in the $NaF–AlF_3–Al_2O_3$ system: effects of alumina, temperature, gas bubbling and dissolved metal, 485
Aluminium electrodeposition from $AlCl_3$–NaCl melts on glassy carbon, platinum and gold electrodes, 275
Electrochemical properties of metal–molten salt mixtures, 789
Electrochemical reduction of praseodymium chloride in LiCl–KCl melt, 937
Studies of the kinetics of aluminium incorporation into an iron electrode in molten salts by linear sweep voltammetry, 271
The development of cerium oxide coatings from cryolite melts. A self-forming anode for aluminium electrowinning, 225
The solubility and electrochemistry of alkali metal oxides in the molten eutectic mixture of lithium carbonate-sodium carbonate-potassium carbonate, 901

Solid state

Analysis of molten industrial silicates by electrochemical techniques, 729
$Ca_{12}Al_{14}O_{33}$ – A possible high-temperature moisture sensor, 410
Factors affecting the functioning of solid state fluoride galvanic cells, 475
Studies of nonisothermal solid state galvanic cells – effect of gradients on EMF, 394
